Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Detailed Action

This application is a national stage application of PCT/IL2005/000197, filed February 17, 2005, which claims benefit of provisional application 60/544305, filed February 17, 2004. Claims 1-54 are pending in this application and examined on the merits herein. Applicant's preliminary amendment submitted August 17, 2006 is acknowledged wherein claims 11 and 15 are amended.

Election of Species

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Various different pathological conditions to be treated by the methods of the claimed invention, including parasitic infection, bacterial infection, viral infection, nerve injury or damage, nerve regeneration, Downs syndrome, inflammatory disease, brain injury, lung cancer, cancer, head and neck cancer, skin cancer, pancreatic cancer, metastatic cancer, GI cancer, GI disease, skin disease, allergy and autoimmune disease.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise require all the limitations of an allowed generic claim. Currently, the following claim(s) are generic:

Claims 1-6, 9, 11-47, and 49-54 are generic to all species, while claims 7, 8, and 10 are generic to a portion of the disease species.

The claims are deemed to correspond to the species listed above in the following manner:

Claim 48 is directed solely toward malignant cell growth (cancer).

REQUIREMENT FOR UNITY OF INVENTION

As provided in 37 CFR 1.475(a), a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in a national stage application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. In the instant case, the only shared special technical feature between all the claims is the use of

certain unsaturated disaccharides as therapeutic agents. As disaccharides of this structure are known in the art, for example US patent 6750207, (cited in PTO-1449) to be useful for treating various diseases, they do not constitute a shared special technical feature over the prior art.

The determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim. See 37 CFR 1.475(e).

A telephone call was made to Martin Moynihan on December 1, 2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
